

Submitted to Future Grant Support for Forestry
Submitted on 2023-04-18 21:41:12

Ministerial Foreword - Forestry in Scotland is a sector that we can be justly proud of.

1 - Introduction and Rationale for Providing Grant Support for Forestry

1. Do you agree that grant support for forestry should continue to be improved and developed as a discrete scheme within the overall package of land support?

No

Please explain your answer in the text box.:

It has failed to take account of local communities needs and had a negative impact on the local biodiversity and the environment through the increase use and poor management off logging lorries leading to a decline in air pollution, the condition of roads and quality of life in rural communities

2. Are there any changes that would allow for better complementarity between the forestry and agriculture funding options?

Yes

Please explain your answer in the text box.:

Active and meaningful consultations with communities and residents.

2 - Forests Delivering for Scotland's Climate Change Plan

3. How can the support package for forestry evolve to help tackle the climate emergency, to achieve net zero, and to ensure that our woodlands and forests are resilient to the future climate?

Please explain your answer in the text box.:

Forestry projects that are community ,locally owned and driven by local communities and not economic drivers and absentee owners and management

4. Private investment through natural capital and carbon schemes can make a valuable contribution to climate change. Do you agree that the grant support mechanism should have more flexibility to maximise the opportunities to blend private and public finance to support woodland creation,

No

Please explain you answer in the text box.:

These have been driven solely by economic considerations and don't benefit local communities or the environment

5. How could the current funding package be improved to stimulate woodland expansion and better management across a wide range of woodland types, including native and productive woodlands?

Please explain your answer in the text box.:

Ensure that they are managed to the benefit of local communities and accessible for and by communities

6. Do you agree that it should be a requirement of grant support that woodlands are managed to ensure that they become more resilient to the impacts of climate change and pests and disease?

Yes

How can the grant scheme support this?:

3 - Integrating Woodlands on Farms and Crofts

7. Which of the following measures would help reduce the barriers for crofters and farmers wanting to include woodland as part of their farming business? Please select all that apply.

Better integration of support for woodland creation with farm support mechanisms, Knowing where to get reliable advice, Clearer guidance on grant options, Information on how current land use could continue with trees integrated throughout

Are there others not listed above?:

8. Establishing small woodlands can have higher costs. What specific mechanisms would better support small scale woodlands and woodland ownership?

Please explain your answer in the text box.:

Local and community access ensuring educational opportunities and benefits for all ages

4 - Forests Delivering for People and Communities

9. How can forestry grants better support an increase in easily accessible, sustainably managed woodlands in urban and peri-urban areas?

Please explain your answer in the text box.:

Develop and management of woodland parks and accessible to schools and activities

10. How can grant support for forestry better enable rural communities to realise greater benefits from woodland to support community wealth building?

Please explain your answer in the text box.:

Ensuring local rural communities manage and maintain their own local resources

11. How can the forest regulatory and grant processes evolve to provide greater opportunities for communities to be involved in the development of forestry proposals?

Please explain your answer in the text box.:

Do not give grants to companies driven by profits and who exclude community access to the woodlands

12. How can the forestry regulatory and grant processes evolve to ensure that there is greater transparency about proposals and the decisions that have been made on them?

Please explain your answer in the text box.:

Active and meaningful consultations with communities prior to any grants are awarded

13. Forestry grants have been used to stimulate rural forestry businesses by providing support with capital costs. Do you agree that this has been an effective measure to stimulate rural business?

No

a. How could this approach be used to support further forestry businesses?:

b. How could this approach be used to support further skills development?:

Investment in training/education with local schools and communities

14. How could the FGS processes and rules be developed to encourage more companies and organisations to provide training positions within the forestry sector?

Please explain your answer in the text box.:

Make it a mandatory condition of any grant awarded

5 - Forests Delivering for Biodiversity and the Environment

15. The primary purpose of FGS is to encourage forestry expansion and sustainable forest management, of which a key benefit is the realisation of environmental benefits. How can future grant support better help to address biodiversity loss in Scotland including the regeneration and expansion of native woodlands?

Please explain your answer in the text box.:

Stop large companies from destroying the local environment and biodiversity present prior to planting and planning permission

16. Herbivore browsing and damage can have a significant impact on biodiversity loss and restrict regeneration. How could forestry grant support mechanisms evolve to ensure effective management of deer populations at:

Landscape scale?:

Identify appropriate forestry areas and work with the environment rather than imposing forestry areas everywhere.

Small scale mixed land use?:

If you wish to make any other relevant comments, please do so in the text box below.
