Submitted to Future Grant Support for Forestry
Submitted on 2023-02-27 10:59:30

Ministerial Foreword - Forestry in Scotland is a sector that we can be justly proud of.

1 - Introduction and Rationale for Providing Grant Support for Forestry

1. Do you agree that grant support for forestry should continue to be improved and developed as a discrete scheme within the overall package of land support?

No

Please explain your answer in the text box.:

Whilst being a landowner myself, I am uncomfortable that the grant system for both farming and forestry effectively subsidises the rich at the expense of the poor taxpayer.

Grants should be limited to where there is a clear national need. Government assistance is preferably directed to things like workforce training, research, and easing bureaucratic barriers.

2. Are there any changes that would allow for better complementarity between the forestry and agriculture funding options?

Not sure

Please explain your answer in the text box.:

UK legislation (e.g. on tax) generally treats forestry differently from agriculture, so there is limited scope for Scotland to improve complementarity.

2 - Forests Delivering for Scotland's Climate Change Plan

3. How can the support package for forestry evolve to help tackle the climate emergency, to achieve net zero, and to ensure that our woodlands and forests are resilient to the future climate?

Please explain your answer in the text box.:

No need for this. Increasing warmth and CO2 is increasing our forest growth rates. Scottish forestry benefits from climate change, unlike for instance Scottish skiing which is sadly on its last legs.

4. Private investment through natural capital and carbon schemes can make a valuable contribution to climate change. Do you agree that the grant support mechanism should have more flexibility to maximise the opportunities to blend private and public finance to support woodland creation,

No

Please explain your answer in the text box.:

Many carbon schemes look very dubious.

5. How could the current funding package be improved to stimulate woodland expansion and better management across a wide range of woodland types, including native and productive woodlands?

Please explain your answer in the text box.:

6. Do you agree that it should be a requirement of grant support that woodlands are managed to ensure that they become more resilient to the impacts of climate change and pests and disease?

No

How can the grant scheme support this?:

3 - Integrating Woodlands on Farms and Crofts

7. Which of the following measures would help reduce the barriers for crofters and farmers wanting to include woodland as part of their farming business? Please select all that apply.

Are there others not listed above?:

Better advice on how farmers can benefit commercially from woodland. The Irish do this - see for example <https://forestry.designwest.ie/public/>.

8. Establishing small woodlands can have higher costs. What specific mechanisms would better support small scale woodlands and woodland ownership?

Please explain your answer in the text box.:

4 - Forests Delivering for People and Communities

9. How can forestry grants better support an increase in easily accessible, sustainably managed woodlands in urban and peri-urban areas?

Please explain your answer in the text box.:

Fly-tipping and vandalism are major concerns here, and better policing is more important than better grants.

10. How can grant support for forestry better enable rural communities to realise greater benefits from woodland to support community wealth building?

Please explain your answer in the text box.:

11. How can the forest regulatory and grant processes evolve to provide greater opportunities for communities to be involved in the development of forestry proposals?

Please explain your answer in the text box.:

12. How can the forestry regulatory and grant processes evolve to ensure that there is greater transparency about proposals and the decisions that have been made on them?

Please explain your answer in the text box.:

13. Forestry grants have been used to stimulate rural forestry businesses by providing support with capital costs. Do you agree that this has been an effective measure to stimulate rural business?

Not Answered

a. How could this approach be used to support further forestry businesses?:

b. How could this approach be used to support further skills development?:

14. How could the FGS processes and rules be developed to encourage more companies and organisations to provide training positions within the forestry sector?

Please explain your answer in the text box.:

5 - Forests Delivering for Biodiversity and the Environment

15. The primary purpose of FGS is to encourage forestry expansion and sustainable forest management, of which a key benefit is the realisation of environmental benefits. How can future grant support better help to address biodiversity loss in Scotland including the regeneration and expansion of native woodlands?

Please explain your answer in the text box.:

16. Herbivore browsing and damage can have a significant impact on biodiversity loss and restrict regeneration. How could forestry grant support mechanisms evolve to ensure effective management of deer populations at:

Landscape scale?:

Small scale mixed land use?:

If you wish to make any other relevant comments, please do so in the text box below.

Please add your comments here.:

Why is the focus solely on deer populations? Rabbits and sheep are also a problem - I have recently had more damage from rabbits than sheep.

About you

What is your name?

Name:
