

Submitted to Future Grant Support for Forestry
Submitted on 2023-04-19 13:02:53

Ministerial Foreword - Forestry in Scotland is a sector that we can be justly proud of.

1 - Introduction and Rationale for Providing Grant Support for Forestry

1. Do you agree that grant support for forestry should continue to be improved and developed as a discrete scheme within the overall package of land support?

No

Please explain your answer in the text box.:

Food before trees.....in all areas...unless they are actually shelter belts or inaccessible (for arable) bits of hill land ! Food First esp now with the Ukraine war

2. Are there any changes that would allow for better complementarity between the forestry and agriculture funding options?

Not Answered

Please explain your answer in the text box.:

Strategic shelter belts.....not blanket planting

2 - Forests Delivering for Scotland's Climate Change Plan

3. How can the support package for forestry evolve to help tackle the climate emergency, to achieve net zero, and to ensure that our woodlands and forests are resilient to the future climate?

Please explain your answer in the text box.:

Focus on other forms of Carbon Capture with offshore windfarms & solar panels offshore....or only on roofs ...not on arable, or productive farmland

4. Private investment through natural capital and carbon schemes can make a valuable contribution to climate change. Do you agree that the grant support mechanism should have more flexibility to maximise the opportunities to blend private and public finance to support woodland creation,

No

Please explain your answer in the text box.:

OTT.....doesn't need any more public funds.....feed the people first

5. How could the current funding package be improved to stimulate woodland expansion and better management across a wide range of woodland types, including native and productive woodlands?

Please explain your answer in the text box.:

Not necessary....

6. Do you agree that it should be a requirement of grant support that woodlands are managed to ensure that they become more resilient to the impacts of climate change and pests and disease?

No

How can the grant scheme support this?:

Scrap the support systems for forestry.....people can't eat trees or sovereignty.....get real

3 - Integrating Woodlands on Farms and Crofts

7. Which of the following measures would help reduce the barriers for crofters and farmers wanting to include woodland as part of their farming business? Please select all that apply.

Are there others not listed above?:

Not necessary.....Food First always

8. Establishing small woodlands can have higher costs. What specific mechanisms would better support small scale woodlands and woodland ownership?

Please explain your answer in the text box.:

Private investment only

4 - Forests Delivering for People and Communities

9. How can forestry grants better support an increase in easily accessible, sustainably managed woodlands in urban and peri-urban areas?

Please explain your answer in the text box.:

10. How can grant support for forestry better enable rural communities to realise greater benefits from woodland to support community wealth building?

Please explain your answer in the text box.:

They can't.....forestry will lead to Clearances.....open your eyes

11. How can the forest regulatory and grant processes evolve to provide greater opportunities for communities to be involved in the development of forestry proposals?

Please explain your answer in the text box.:

Not necessary

12. How can the forestry regulatory and grant processes evolve to ensure that there is greater transparency about proposals and the decisions that have been made on them?

Please explain your answer in the text box.:

Codswallop

13. Forestry grants have been used to stimulate rural forestry businesses by providing support with capital costs. Do you agree that this has been an effective measure to stimulate rural business?

No

a. How could this approach be used to support further forestry businesses?:

Leading to Clearances

b. How could this approach be used to support further skills development?:

As above

14. How could the FGS processes and rules be developed to encourage more companies and organisations to provide training positions within the forestry sector?

Please explain your answer in the text box.:

Not necessary

5 - Forests Delivering for Biodiversity and the Environment

15. The primary purpose of FGS is to encourage forestry expansion and sustainable forest management, of which a key benefit is the realisation of environmental benefits. How can future grant support better help to address biodiversity loss in Scotland including the regeneration and expansion of native woodlands?

Please explain your answer in the text box.:

No to rewilding.....food First

16. Herbivore browsing and damage can have a significant impact on biodiversity loss and restrict regeneration. How could forestry grant support mechanisms evolve to ensure effective management of deer populations at:

Landscape scale?:

Not necessary

Small scale mixed land use?:

Not necessary

If you wish to make any other relevant comments, please do so in the text box below.

Please add your comments here.:

Food First.....simple as.....shelter belts only.....no rewilding.....pouring silly money after silly money...Wake up.....Food First

About you

What is your name?
