

Summary of Land Management Plan Proposals

Lamachan LMP is part of South Region (west) and is important for both the sustainable production of Timber and for the maintenance of Water quality within the R Cree catchment. Landscape enhancement and species Conservation are also important considerations.

Plantation area	1409.0ha
External Open ground area	539.0ha
Total Plan area	1948.0ha

Species breakdown (plantation)	2020 (current)	2030 (end plan period)
Primary species: Sitka Spruce	52.6%	57.6%
Secondary species: other conifer	26.9%	34.1%
Native broadleaf	1.1%	3.9%
Open space	19.4%	4.4%

Planned Operations	2020–2030 plan period
felling	100.0ha
thinning	355.5ha
restock	59.5ha
road construction	0m
road upgrade	14000m

Significant Environment / Conservation Features	
Minimum Intervention / Natural Reserve / Long Term Retention	4.3% of plantation

Critical Success Factors:

- Enhance and expand Native broadleaf areas throughout plan area
- Improve water quality throughout R Cree catchment (centred on Penkiln and Pulnee Burns)
- Increase species diversity within the plan area

Consultation and Further Information:

During the development of this plan we have consulted publically including meetings with the local community representatives and stakeholders known to have an interest in this plan area.

For further information on the plan please contact Stephen Stables, Planning Forester, South Region, Forestry and Land Scotland on 01313705830 or stephen.stables@forestryandland.gov.scot
